

# FacetTerm<sup>®</sup>

*Your Window On Unlimited  
Terminal Productivity*

FacetCorp 

Do you ever find yourself working in one application, when you suddenly need access to another? **FacetTerm** from **FacetCorp** provides the perfect solution by eliminating the cumbersome requirement of closing one application just to start another.

### **The Productivity Solution**

**FacetTerm** lets UNIX system users run up to ten simultaneous sessions from a single character terminal (or a PC running terminal emulation).

You

***FacetTerm allows you to run virtually any character application with practically any character terminal on any UNIX host system.***

can hot key from one session to the next as often as you want while taking advantage of features such as copy and paste between screens, Window Watch,<sup>™</sup> screen print and a pull-down menu interface.

**FacetTerm** significantly improves productivity by allowing concurrent access to database management, word processing, system administration functions, e-mail, or any other character-based application. But most importantly, you don't have to make any changes to your existing applications.

**FacetTerm** also allows you to customize the user interface to meet your individual computing requirements. For example, applications can be automatically launched when you log in, and the pull-down menus can be tailored so that they reflect the applications you typically use. If you need to access multiple or remote hosts, **FacetTerm** can start any communications software needed for remote access, and log you in to these systems.

### **Window Watch**

The Window Watch feature in **FacetTerm** automatically notifies you when any off-screen event occurs. As soon as you receive

electronic mail messages, or a report you are running in another window is completed, Window Watch instantly notifies you. Window Watch can even watch for a specific string of characters (like your favorite stock symbols), and notify you when they are encountered. You can also configure the alarm process to notify you of an event via audible and/or customized pop-up messages.

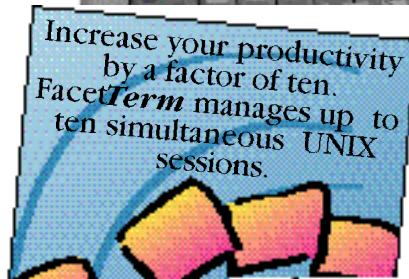

**FacetTerm** also comes with two

distinct printer features. With the Screen Print feature, you can immediately print exactly what's on the screen (including any line-drawing characters) to any UNIX system printer. With the Transparent Print feature, **FacetTerm** will manage a printer attached to a terminal or PC as a shared spooled system printer. While Transparent Printing is in use, **FacetTerm** allows the attached terminal or PC keyboard to remain active and keep you productive!

In addition, **FacetTerm** enhances data security by providing a Screen Lock feature. Screen Lock allows you to leave the terminal or PC in a secure (blank display) mode, but without exiting your applications. It can also be set to automatically secure your system after a specified time of inactivity. Only you can unlock your display.

### **Users Endorse FacetTerm**

**FacetTerm** is saving significant time and money for companies in all sorts of industries. **FacetTerm** is widely used by organizations such

as:AT&T GIS, JCPenney, Sears, Harrods, Kroger Company, Hyatt Hotels, GTE, American Airlines, Martin Marietta, BMW, American States Insurance, PPG Industries, Pentax, and many others.

## Reseller Capabilities

For VARs, resellers and system integrators, FacetTerm can be your perfect product differentiator. Features such as flexible pull-down menus and function key programming allow you to provide a fully customized solution. It gives you the ability to easily tie customer applications together and provide a consistent user interface. The FacetTerm Authorized Reseller Program provides an easy way for you to offer these capabilities risk-free.

## FacetTerm Features

- Run up to 10 simultaneous applications
- Use with character terminals, Alpha-Window terminals, or PCs with a terminal emulator
- Copy and paste between applications
- Print the screen to a system printer
- Receive automatic notification of any off-screen activity (such as e-mail)
- Improve data security with the automatic screen lock feature
- Use terminal page memory for instantaneous screen refresh
- Leverage the 132 column/43 line mode in many terminals
- Use a printer attached to a terminal as a shared spooled device
- Take advantage of the easy-to use, customizable pull-down menu interface
- Speed up switching between sessions with the accelerator keys

## Free Evaluation

With our free evaluation program you can experience the benefits of FacetTerm before you buy. We encourage you to take advantage of our 30-day free evaluation program for up to 50 users. You'll get to use complete functionality, documentation and support. Contact us today for your free trial copy.

## FacetTerm Runs On...

...color terminals...

...monochrome terminals...

...PCs with terminal emulation.

"The folks at FacetCorp have achieved sainthood with FacetTerm 3.0. This product makes character terminals far more useful than they were ever meant to be." **UNIX Review**

"The multi-session capability of FacetTerm adds real productivity benefits for Wyse terminal users." **Terry Eastham**, Vice President, Terminals and Display Products Marketing, **Wyse Technology**

"FacetTerm enhances the SCO system model by giving low-cost character terminals the complete functionality of UNIX workstations. We are pleased at its recognition as the SCO Product of the Year for Best System Utility Software." **Roberta Gray**, Director of Developer Relations, **Santa Cruz Operation**

"By including Facet's FacetTerm with the HP 700/70 multi-session windowing terminal, HP is providing the next step in terminal functionality and user productivity."

**David J. Hoover**, Operation Manager, **Hewlett Packard's Systems Peripheral Operation**

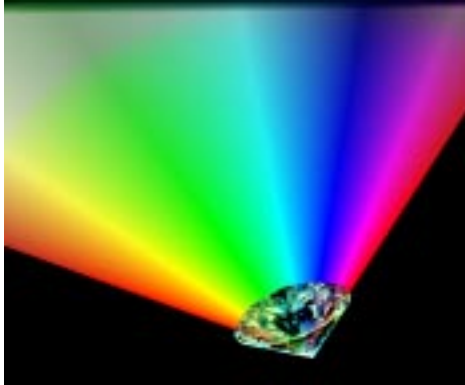

"By allowing TeleVideo terminal customers to manage multiple UNIX sessions from a single terminal, FacetTerm has significantly enhanced user efficiency."

**Isaac Levanon**, Executive Vice President, **TeleVideo Systems**

"The functionality of FacetTerm enhances the value of Link terminals, from the MC2 all the way to the WT80." **Larry Schuster**, Vice President of Sales and Marketing, **Link Technologies**
