

MXI CLIPDRIVE BIO: BIOMETRIC SECURITY USB DRIVE

USB MEMORY DRIVE SECURED BY BIOMETRICS AUTHENTICATION AND ENCRYPTION

ClipDrive Bio™ is the most secure and advanced USB 2.0 & USB 1.1 data storage device on the market. Using leading edge biometric fingerprint technology, the scanner authenticates a user's identity & then gives the user access to the hidden secure partition on the ClipDrive Bio™. All data saved on the Secure Partition portion of the ClipDrive Bio™ is automatically encrypted and hidden. For an even higher level of encryption, our ClipGuard Bio® software allows you to encrypt and decrypt files/folders on your ClipDrive Bio™ or PC at your discretion.

Small enough to slip into your pocket, the ClipDrive™ USB portable drives enable you to quickly, easily and confidentially transport business documents, presentations, multimedia files, photos, music files-anything-anywhere! Choose from our standard ClipDrive™ line, with secure data encryption or from our new ClipDrive Bio™ line which uses state of the art fingerprint authentication technology to prevent unauthorized access to its data. The drive features a biometric fingerprint sensor that assures 100% protection for your valuable data. The ClipDrive™ & ClipDrive Bio™ flash drives are connected to a PC using the USB interface and can be used just like an ordinary hard disk drive.

Security is further enhanced by using external applications, such as encryption and access management software: the ClipDriveBIO is a perfect biometric device for enterprise deployment, windows and web login, with the SentiNET software.
